# Penny Packet Seeds for School and Home Gardens

## TEACHERS' ORDER BLANK

**Two Kinds of Order Blanks** This one, printed in red ink and headed, "Teacher's Order Blank," is for your exclusive use. The one printed in black ink, headed, "Senior Order Blank," is for the pupils.

**Plan of Distribution** We supply you with one of the red order blanks for each teacher interested and one of the black order blanks for each pupil. All you have to do to start is fill in the enclosed post card and mail it to us. We will then send you the order blanks you will need. This lets us do the detail work instead of making you do it.

**When You Receive the Order Blanks** Tell your boys and girls to take the order blanks home so that the parents may help in the selection of the seeds to be planted. Then have them bring their orders and the money to pay for them back to you on a certain day. You can then send all the orders from your room and a money order for the total amount the children have brought you, direct to The Children's Flower Mission, 5700 Detroit Ave., Cleveland, O.

**When You Send the Orders To Us** Send all in one package. If the package weighs less than one pound, send it by FIRST-CLASS MAIL. (You cannot send anything with writing on by Parcel Post.) If the package weighs more than one pound, send it by EXPRESS COLLECT. If at all possible, send the money by POSTAL or EXPRESS MONEY ORDER as that is safest. If you cannot do so, send a check. Cash is too easily lost in the mails and stamps should not be used because we receive many more than we can use from people who do not know our wishes.

**Do Not Keep Copies of the Orders** We always return the original orders with the seeds, so it is not necessary for you to keep copies. These orders are each pasted to a large envelope in which we place all the packets for that particular order.

**Absolutely No Expense To You** We prepay all the carrying charges on the supply of order blanks as well as on all seeds, bulbs and roots ordered by the pupils. For the money order which you must purchase in sending in the money for the goods, you may select free seeds up to the cost of the money order.

**To Compensate You** For the work you have done, you may select, on this order blank only, free seeds, to the amount of ten per cent of all the orders from your room. In other words, if your orders total \$10.00, you may select one hundred of the penny packets of seeds. Some teachers use these free seeds for beautifying the school grounds, others for their own homes and some give them to children too poor to pay for their own.

**Our Guarantee** If, after careful planting, care and cultivation, any goods purchased from us do not prove satisfactory and you believe the failure due to the quality or condition of stock when received, we will adjust all claims by replacing, or if too late, by refunding to you the amount paid for such items. This amounts to a guarantee of absolute satisfaction or your money back.

# POPULAR VEGETABLE SEEDS

Illustrations and Cultural Instructions printed on each packet

Price Only  
One Cent  
Per Packet

We contract one and two years in advance, with experienced growers of well known reputation, in various sections of Europe and America, for our annual requirements of Vegetable Seeds, and are therefore in a position to continue to supply seeds of the highest quality at the Popular Penny-Packet Price, regardless of present high prices.

We state approximately length of row, or number of hills or plants each packet will produce

# Vegetable Seeds of Special Merit

*The following list includes a few of the most desirable vegetables of recent introduction, as well as some very interesting novelties. Mark quantity and price of each variety wanted in space beneath.*

## DeLue's Golden Giant Sweet Corn

Introduced by Dr. DeLue of Boston, Mass., who originated it by crossing Golden Bantam with "Howling Mob," resulting in a short, vigorous, sturdy growth and large 12 to 14-rowed golden yellow ears. As to quality it is enough to say that it is fully up to Golden Bantam, which is generally recognized as the highest standard of quality. Its greatest merit is its productiveness, repeated tests having demonstrated the yield to be fully fifty per cent greater while it matures fully as early as Golden Bantam. We confidently recommend it both for home use and for market. For 1/4 lb. see No. 187 on page 4.

241, Oz. Pkt. 5c, 1/4 lb. 15c.

## Chinese Yard Long Bean

An interesting novelty from China, the long, slim, round pods attaining a length of 2 to 3 feet. Claimed to be of excellent quality as a snap bean. We however are of the opinion that its greatest merit is as a curiosity that always attracts attention. The French Yard-Long Bean has much larger seed and is an excellent table variety. We will include both varieties in each packet in order that the relative merits of both may be tested. Separate the seed before planting.

242, Pkt., 30 to 40 seeds, 5c.

## New Japanese Hulless Pop Corn

Here, boys, is one of the very best up-to-date varieties of Pop Corn. It is also called Australian Hulless, Tom Thumb, etc. It is entirely distinct from all other varieties, being of dwarf, sturdy growth, and a very heavy yielder of uniformly thick short ears, almost as thick as long. The grains are similar to the popular Improved Rice. Early white, of excellent popping qualities, and free from hulls. We know you will be pleased with this variety because of its excellent popping qualities, and fine flavor. If you want to grow something to sell you will find this a money maker.

243, Oz. Pkt. 5c, 1/4 lb. 15c.

## Genuine Snowball Cauliflower

The most delicious of all the cabbage family. We believe this to be the very best variety in existence. To successfully grow Cauliflower very much depends on the quality of the seed. The best seed comes from Denmark, and we contract a year in advance with one of the most reliable Danish growers for our supply. Cauliflower requires rich, deep, moist soil. With this and good seed, it is as easily grown as cabbage. Culture same as for early cabbage.

244, Pkt., 400sds., 10c, 1/8 oz. 25c

## Extra Quality Lawn Grass

We handle only one grade of Lawn Grass. As pure and free from chaff as it is possible to procure. Made up in well-balanced proportions of the following varieties: Kentucky Blue Grass, Red Top, Canada Blue Grass, Creeping and Hard Fescue, R. I. Bent Grass, Perennial Rye Grass and White Clover. Put up in two size packages—a large 10-cent package, convenient for repairing bare places on the lawn, and pound packages, sufficient to sow 400 to 500 square feet of surface.

245, Large Pkt. 10c, 1 lb. 45c.

## Pure White Clover

Some prefer to use this in larger proportions or for mending bare places, as it will usually establish itself where other grasses often fail.

246, 1/4 lb. Pkt. 25c, 1 lb. 85c.

## The Landreth Tomato

After carefully comparing the relative merits of the many varieties of recent introduction, we have selected the Landreth as combining more desirable qualities than any other. It is very early. Medium large and solid, considering its earliness. Just the right size, uniformly smooth, and very productive, prolonging its fruiting season so that it may be depended on for both early and main crop. Largely grown for supplying canning factories.

247, Pkt. 10c, 1/2 Oz. 40c.

## Extra Early Knight Muskmelon

An extra early, medium sized melon for the home garden. Especially valuable in the extreme North where the ordinary varieties will not mature. Largely grown in Manitoba and North-Western Canada for market. Fruit oval, skin green, closely netted, turning to golden yellow when ripe. Flesh thick, medium green, blending to light pink near the center. Exceedingly sweet and luscious. The earliest high-quality melon grown.

248, Pkt. 10 cts., Oz. 20 cts.

## New White Pickling Onion

SILVER BELL. The earliest Onion in cultivation, and the best of its class. The bulbs are small, very uniform in size, and of a distinct transparent silvery-white color. Very mild in flavor, and just the right size for pickling. Sow the seed early, in drills, not quite as thickly as you would to grow sets. They mature quite early, when they should be pulled and stored in a dry place until wanted.

249, Pkt., 500 sds., 8c, Oz. 25c.

## Extra Early Spanish Peanuts

Say, boys, wouldn't you like to try your luck growing Peanuts? It is not generally known that they can be successfully grown in the North. By planting the Extra Early Spanish variety, they will mature a nice crop if planted on light sandy soil in full sunshine. The nuts are not quite as large as those you buy at the fair, but are quite solid and sweet. Plant and cultivate same as Beans when soil is quite warm, usually last of May.

250, Large well filled pkg. 5c.

## Japanese Radishes

A very interesting packet, containing an equal mixture of the following interesting varieties, which we import direct from Japan: Bottle Radish, String Radish (2 to 3 feet long), Long Nerima or Mikado, Mjyashige, Giant Round Shogoin and Sakurijima or Japanese Mammoth, growing to the enormous weight of 20 to 25 pounds. Try a packet. Plant in rich deep soil and see if you cannot take first prize at your school exhibition or county fair.

251, Pkt., about 150 sds., 5c.

## New French Carrot

RED GIANT. All of our best varieties of Carrots originally came from France. Here we have a new variety introduced by a trustworthy French grower, who claims it to be of fine table quality, and growing to very large size, frequently attaining 4 to 5 pounds in weight. It has never before been offered for sale. Try a packet and take the first prize at your school exhibition or county fair.

252, Pkt., about 500 sds., 5c.

# Flower Seeds of Special Merit

*In the following list we have selected a few of the most desirable new and high priced varieties that cannot be supplied at the popular Penny Packet prices, believing that many will be glad of the opportunity to try them. Mark quantity wanted and price in spaces below.*

## Giant Exhibition Pansies

The Best That Money Can Buy

No flower is more universally admired than the Pansy and in no other class of flowers have there been greater developments than in the large Flowering or Giant Pansies. In order that our Patrons may enjoy growing the best there are, at a nominal expense, we have selected the choicest varieties from a number of European Pansy Specialists as follows: Bugnot's Giants, Giant Bridesmaid, Cassier's Three and Five Blotched Giants, Giant Daybreak, Giant Fire King, Madam Perret or Phenomenal, Pretiosa, Mammoth Sunlight, Parisian Large Blotched and Stained, Masterpiece or Ruffled Giants, Odier Five Blotched, Orchid Flowering Giants, President Carnot, President McKinley, Emperor Franz Joseph, etc. Each packet will contain a mixture of all the above and other expensive Large Flowering Varieties. Absolutely the highest priced seed that money can buy.

253, Pkt. 125 seeds, 15c, 2 pkts. for 25c, 5 pkts. for 50c, 1/8 ounce pkg. 90c.

## Burbank's Shasta or Alaska Daisy

A perfectly hardy Perennial. If sown early, will bloom the first season. Blooms freely from July to September, bearing large, single, pure glistening white flowers, 3 to 4 inches across, on long stiff stems. Splendid for cut flowers remaining several days in a fresh condition. Forms large clumps that are completely covered with flowers. Worthy of a place in every garden.

254, Pkt., 40 to 50 seeds, 5 cts.

## Chinese Woolflower

Among the many beautiful flowers that have come from China, the Chinese Woolflower stands with the leaders. Gives a veritable mountain of bloom from early July until frost.

Plants grow two to three feet high. Scores of branches are thrown out, each bearing a ball of scarlet wool. The plant looks like an immense bouquet splendidly arranged and set in the ground. Flowers cut fresh and carefully dried retain their shape and brilliant color and are useful in winter decorating, like Everlastings. Easy to grow.

255, Pkt. 200 sds. 10c, 3 Pkts. 25c

## Aster, American Beauty

This variety is similar in type of flower and growth to the well-known Late Branching Asters. Plants will average two and one-half to three feet in height, according to location, with immense flowers, usually four to five inches in diameter. The flowers are fully double to the last, and are a most lovely shade of bright carmine rose. The true "American Beauty" Color.

256, Pkt. 250 sds. 10c, 1/8 oz. 25c

## Petunia, Rosy Morn

The plants are bushy and compact. The flowers, which are of medium size, are produced in the greatest abundance throughout the entire summer and fall. They are a most pleasing clear bright pink, contrasted by a broad white throat. One of the most useful plants we know for porch boxes, vases, etc., and equally desirable for bedding.

257, Pkt., 150 to 200 sds., 10 cts.

## Cardinal Climber

(Ipomoea Quamoclit Hybrida)

A distinct and valuable novelty and one of the most beautiful climbers. A strong and very rapid grower and free bloomer; the vines branch freely, covering a large space very quickly and growing to a height of 15 to 20 feet. Leaves are dark green, fern-like and deeply laciniated; bears a great profusion of fiery, cardinal red flowers, which are about 1 1/2 inches in diameter. It delights in a warm, sunny situation and good soil.

Soak the seed 24 hours before planting and do not plant outside before last of May.

258, Pkt., 25 to 30 seeds, 10 cts.

## New Red Flowering Sunflower

Also called "Rainbow Sunflower." A very showy type of Helianthus. Well worthy of a place in the flower garden where it is sure to attract attention. Height 4 to 5 feet, and an abundance of single flowers 4 to 6 inches across. Some flowers are a rich chestnut red, others yellow tipped red, while others are slightly washed or stained red. Very easy culture.

259, Pkt., 25 to 30 seeds, 5 cts.
